

PRESS RELEASE

E-Transit Announces Acquisition of MCI's Toll Collection Technology

*Additional Software Rights Enhances E-Transit's Offerings
in the Toll Collection and Intelligent Transportation System Markets.*

Bridgeport, PA — February 1, 2006

E-Transit, Inc. announced today it has acquired MCI's rights to its toll collection system technologies. The intellectual property includes products deployed by MCI, as well as MFS Network Technologies, MFS TransTech, MFS Transportation Systems, Adesta, and Worldcom ETC Systems.

The abovementioned rights permit E-Transit to modify, enhance, license and market several versions of toll collection system software, including software used at toll facilities operated by the New Jersey Turnpike, Garden State Parkway (New Jersey), E-470 (Colorado), Richmond Metropolitan Authority (Virginia), California Dept. of Transportation, St. John Harbour Bridge Authority (Canada), Halifax-Dartmouth Bridge Commission (Canada), Cobequid Pass (Canada) and others.

Included in the intellectual property are hardware and system designs, patents, and software packages for lane controllers, plaza computers, host computers, video based toll audit systems, maintenance on-line management systems, ETC customer service centers, and violation processing centers.
